# Example reading traits answers to questions

## **WOULD EITHER OF THESE PEOPLE BE SAFE DRIVING A CAR?**

No, the give away sign is the whites under the eyes (bottom lids) showing they suffer from extreme stress known as melancholy. This is an indication that people with this environmental trait have been under extreme stress for some time. Due to lack of concentration they can become accident prone and are not safe using machinery or driving. They can become very emotional or mentally unstable. When one sees this sign they should be concerned to help the individual to resolve whatever it is going on in their lives causing the stress.

## **IF THEY ASKED TO TAKE YOUR CHILDREN TO SCHOOL, WOULD YOU SAY YES, OR NO?**

The safest answer to this is to decline the offer as allowing someone to drive your children in a car that they themselves could be a risk could result in being involved in a serious accident which could cost both their life and anyone with them.

The solution is to find out what the real cause of the problem and then to take measures to rectify the problem. In time the eyes will relax and go back to normal. More information can be found in the book “**Face Reading – How to read the traits of the face**”.

# Another Example

- **WHAT IMPORTANT THING DO YOU NEED TO REMEMBER WHEN TALKING TO THIS PERSON?**
- **WHAT WILL REALLY IRRITATE HER?**

One of the obvious traits is that this lady is analytical, which can be observed from the top eye lids often referred to as they oriental look. When we see this trait, these people get really irritated if you just give them a short straight answer. They are mentally asking why, when, how and who, so they need lots of information to satisfy they desire for knowledge and information, they just seem to have the innate desire to want to know everything and are very curious by nature. To leave them with just a basic sentence as an answer will get them mentally frustrated and agitated.

- **IF YOU MET THIS LADY FOR THE FIRST TIME AND STEP FORWARD TO GIVE HER A KISS ON THE CHEEK, WOULD SHE BE VERY PLEASED OR FEEL UNCOMFORTABLE AS YOU INVADED HER PERSONAL SPACE?**

People with very high eyebrows raising to the outside, found more so in woman are what we call discriminative, this means they tend to be little choosy about close contact and fiends. They are in fact more formal in almost everything they so. You will not get offered a mug of tea and beacon roll, no, you will get a nice china tea cup and saucer, and neatly cut sandwich. They are friendly but just like to have a little space. If you invade this personal space, by standing too close, they will tend to back off and you will see they will give off signs of feeling uncomfortable, they will start to get little agitated and will in some cases will gently raise a hand with the palm out toward you, while they are speaking, as if to say “back off”. A first introduction or meeting with such people it is best to keep it simple and discreet with just a handshake. Later as they get to know you they will be more inclined to be affectionate. This is not to say they are not, they just do not like outward displays of affection to people they do not know. Once they are comfortable with you, they can be very close and will welcome you with open arms. People in business would do well to understand this trait, it could make the difference from winning favor or completely offending the individual ruining a chance of a further meeting.
